

Xm provides a wonderful service. As a truckdriver the 24 traffic and weather makes my job safer. I can avoid traffic and unsafe road conditions by listening to conditions 24 hours a day. Many of my coworkers do the same thing, which helps ease congestion in major cities by finding alternate routes. If you are from out of town in a major city you don't know which radio station to listen to to get traffic. Also, most radio stations only do traffic during rush hour. Xm should be protected under the first amendment just like regular radio stations are.
